ILLEGIB

station in Schlag (48°57'N, 15°01'E).

11. A watchtower 45 meters high has been built at (48°55'N, 15°58'E).
12. A watchtower 35-40 meters high has been built at (48°55'N, 15°58'E).
13. A watchtower has been built near Kote 130 (48°52'N, 15°37'E), Austria.
14. A watchtower 8-9 meters high has been built 300 meters southeast of the Mitter-Betzbach (48°47'N, 15°59'E)-Gaenserndorf (48°48'N, 15°59'E) highway about one kilometer from the Czech border. Across from Mitter-Betzbach is a watchtower 10-12 meters high on the railroad station in Svatava (48°48'N, 16°01'E), Czechoslovakia. Two telephone lines lead from this tower to other towers.
15. A watchtower 7-8 meters high, equipped with electric light and telephone lines, has been built at Kote 130 about 4 kilometers east of the Lit.-Prerau (48°48'N, 16°29'E) freight station.
16. A watchtower about 13 meters high has been built into a tree about 500 meters north of the Dreesing March River bridge (48°32'N, 16°17'E) and about 250 meters from the Austrian border.
17. A watchtower 12 meters high has been erected on the March River dike about 700 meters north of Kote 141 across from Bezirk Gaenserndorf. Previously there was a watchtower built into a tree at this spot.
18. A watchtower has been built about one kilometer south of the church tower in Theben Neudorf (48°13'N, 16°59'E), Czechoslovakia, across from Gaenserndorf and about 150 meters from the March River bank.

Barbed Wire Entanglements

19. A barbed wire entanglement two meters high has been put up over a fire-break 300 meters from the border and about one kilometer northwest of Gross-Nagelberg (48°52'N, 14°59'E). The barbed wire entanglement along the Austro-Czech border from Kossalevndorf (48°54'N, 14°59'E) to Gross-Nagelberg has probably been completed. The wooded area near the border between Gross-Nagelberg and Neu-Nagelberg (48°49'N, 14°58'E) has been cleared, some of the trees having been removed and some cut to stumps 2 or 3 meters high.
20. A barbed wire entanglement 2.5 meters high, 3 meters wide and 2,500 meters long has been put up from Kote 495, Breitenazzo (48°55'N, 14°59'E), to the eastern bank of the Svoboda Pond (48°56'N, 14°59'E). This entanglement lies across the border from the Austrian Gendarmerie post at Litschau (48°56'N, 15°02'E).

Other Construction Work

21. A bunker has been built about one kilometer south of Kote 154 and about 300 meters from the Czech border across from Dreesing (48°32'N, 16°54'E), Austria.
22. The concrete bunkers which were put up before 1938 along the border between Dinburg (48°24'N, 15°51'E) and Hochstetten (48°20'N, 16°55'E), Czechoslovakia, have now been recondoled.

- 3 -

23. Across the border from Bernhardsthal (48°42'N, 16°52'E), Austria, a telephone line was put up, which leads to a tree located about 500 meters northeast of Kote 187. It is not known whether there is an observation post at this point.
24. The Czechs have reconditioned a bunker, originally built in 1938, about 750 meters northeast of the partially destroyed March bridge in Duernkrut (48°25'N, 16°57'E). The sides of the bunker, which face the March River, are covered with earth and sod bricks. The loopholes point straight to the Austrian bank where the road ends at the dam (sic). There is a second bunker, partly sunk, in the brushwork between the first bunker and the road. This second bunker is so camouflaged with undergrowth that it cannot be seen from the Austrian side of the river.
25. Excavation is in progress in the triangle bounded by Kote 151 - Blaha Blaka, 153 - Blaha Rybnik and 154 - Husi Dolina, in Czechoslovakia.
